Forecast for Friday 04 Nov 2022

Weather: A cool night with some localised frost will lead into a sunny morning, perhaps some mist in prone spots but the fresh northerly breeze will prevent that becoming too widespread. During the morning cloud will increase and a few well scattered showers will develop in the afternoon but plenty of bright or sunny spells too. These should move through quite quickly and mostly die out in the evening.

Chance of cloud-free hill tops above 800m: 90%, patches of low cloud forming around the summits in afternoon showers.

Low cloud and visibility: Patches of low cloud forming in the afternoon in showers above 600m. Otherwise fell tops mainly clear and good views expected at height around the Lake District.

Meteorologist's View

Feeling quite chilly in fresh northerly winds, especially in the morning.

Forecast for Saturday 05 Nov 2022

Weather: Although mainly dry overnight, thickening cloud and rain will spread across the Lake District during the morning, rain is not expected to be heavy and some drier spells in the north of the area, rain will clear east afternoon but some low cloud, mist and drizzle may linger into the afternoon. Cloud clearing later in the afternoon with some clear spells during the evening.

Maximum wind: Southerly 20mph with gusts 30mph, turning southwesterly 15-20mph later.

Chance of cloud-free hill tops above 800m: 80% falling to 30% early in the morning, improving to 90% by late afternoon.

Low cloud and visibility: Broken cloud layers forming above 400m as frontal rain moves across the area in the morning, around northern fells cloud will be scattered above 600m with more chance of clear fell tops here. Visibility will be poor in the morning, slightly better around northern fells during the rain.

Temperature: **Valleys:** Plus 4 rising to 11 Celsius.
At 800m: Plus 3 rising to 6 Celsius.
Freezing level: above all summits.
